Document Type	Agent Roles, Responsibilities & System Features
Version	1.1 (MVP)
Effective Date	06 March 2026
Document Owner	Operations Manager / Branch Manager
Classification	Internal Use Only
Prepared By	[Insert name / title]

CRITICAL OPERATING PRINCIPLE — CUSTOMER INTERACTION MODEL

Customers do NOT interact with the AI agent system directly.
All customer-facing interaction is conducted in person by a Loan Officer or Branch Officer.
Officers enter information into the system on behalf of the customer. Agents assist officers — they never replace the human relationship.

System Overview

The Microfinance Management System deploys four specialized AI agents to support branch officers in delivering consistent, auditable, and client-respectful lending and collections services. This document defines each agent's role, responsibilities, features, and performance standards.

The system operates on a strict human-mediated model: officers meet customers, gather information, and then use the system as an operational tool. No agent interacts with a customer directly.

How the System Works

OFFICER-MEDIATED WORKFLOW

- Step 1 — Customer visits the branch and speaks with a Loan Officer or Branch Officer in person.
- Step 2 — The Officer gathers the customer's information, intent, and documents.
- Step 3 — The Officer enters or queries the system; agents process and respond.
- Step 4 — The system provides classifications, checklists, and recommendations back to the Officer.
- Step 5 — The Officer communicates outcomes, next steps, and decisions to the customer.
- Step 6 — Any approval, waiver, or disbursement requires human authorization — agents never approve.

Agent Architecture at a Glance

4	0–5	Always	100%
Agents Deployed	Customer Levels	Human Approvals	Audit Logging

Agent	Primary Function
A1 · Office Coordinator	Routes officer queries; classifies customers; produces triage summaries for staff action
A2 · Loan Processing	Eligibility screening for Levels 0–4; KYC checklist; credit memo for officer review
A3 · Collections & Reminder	Arrears management for Level 5; reminder generation; escalation ladder support
A4 · Finance	Payment confirmation; balance queries; end-of-day cash reconciliation support

Customer Level Model

Each customer is assigned a Customer Level (0–5) derived from information entered by the officer. Levels determine which agent owns the case and what the officer's next action should be. Levels are assigned by the Loan Processing or Collections agent, not by the customer.

Level	Label	Typical Signals	Officer Actions Required
0	Inquiry	Asks about products; no loan intent yet	Officer explains products and enters details into system for Coordinator Agent to log
1	Prospect	Wants a loan; KYC documents not yet complete	Officer collects documents in person and system generates KYC checklist
2	Group Loan Candidate	Eligible for Cycle-1 group loan; willing to form 3-member group	Officer facilitates group formation and Loan Processing Agent creates underwriting pack
3	Trusted Repeat Customer	Prior cycles completed; no arrears; strong on-time history	Officer conducts cashflow review and fast-track assessment is triggered
4	Graduation Candidate	Strong repayment history; qualifies for individual loan pathway	Officer initiates enhanced appraisal and Committee review workflow is opened
5	Delinquent / Recovery	Active loan overdue or repeated broken promises	Collections Officer follows escalation ladder and Collections Agent drafts reminders

GUARDRAILS & DECISION BOUNDARIES

- ✦ Level assignment is performed by AI agents based on data entered by officers. Customers do not self-select or see their level.
- ✦ Level 5 automatically triggers the Collections & Reminder Agent and notifies the Branch Manager queue.
- ✦ Officers may escalate a Manual Review flag at any level if data is incomplete or circumstances are unusual.

A1

Office Coordinator Agent

MISSION

Serve as the central routing hub for officer queries. Capture structured customer details, classify intent, and produce the case summary that staff act on. All officer interactions with the system pass through this agent first.

Primary Users

- ▶ Admin & Customer Service Staff — primary day-to-day system users
- ▶ Loan Officers — query customer status and retrieve checklists
- ▶ Branch Manager — receives escalation alerts and case summaries

Responsibilities

Responsibility Area	Description
Customer Capture	When an officer enters a customer's name, NIC, or phone number, the agent confirms identity against existing records and flags unrecognised customers as new prospects
Intent Classification	Parses officer-entered purpose (new loan, repayment inquiry, balance check) and maps it to the correct specialist agent
Case Triage	Assembles a structured triage summary with customer level, risk band, route, and next action delivered to the officer in a readable format
Workflow Routing	Dispatches the case to Agent 2 (Loan), Agent 3 (Collections), or Agent 4 (Finance) based on triage result
Task Generation	Creates staff task lists covering required documents, scheduled appointments, and follow-up dates
Escalation	Routes to Branch Manager when confidence is below threshold or when policy mandates human review

Inputs & Outputs

Input	Output
Officer-entered customer identifier (NIC / phone)	TriageResult JSON: customer_level, risk_band, route_to_agent, next_action
Officer-described customer intent (purpose of visit)	Officer-readable case summary with recommended next steps
Customer lookup result from existing records	Staff task list (documents required, appointments, follow-ups)

Input	Output
Branch policy configuration (products, DOA, limits)	Routed case to appropriate specialist agent

GUARDRAILS & DECISION BOUNDARIES

- ⚡ Never approves, declines, or commits to any loan decision — only classifies and routes.
- ⚡ Does not disclose balance or loan details unless officer has confirmed customer identity.
- ⚡ Does not generate free-form messages to customers — all outputs are for officer use.
- ⚡ If routing confidence is below threshold, defaults to Manual Review Required and notifies Branch Manager.

Performance Metrics

KPI Metric	Target / Benchmark
Query completion rate (officer reaches a clear next step)	≥ 95% of sessions
Average time-to-triage from officer query submission	< 60 seconds
Routing accuracy (correct specialist agent selected)	≥ 98%
Escalation false-positive rate (unnecessary human escalations)	< 5%

A2

Loan Processing Agent

MISSION

Determine lending readiness for customer Levels 0–4 using officer-entered data and existing records. Output eligibility guidance and a document checklist for the Loan Officer to act on. This agent never approves — it prepares the pack for human review.

Primary Users

- ▶ Loan Officer — receives eligibility guidance and document checklist
- ▶ Branch Manager — reviews officer-prepared credit memo before committee
- ▶ Admin Staff — processes document intake based on agent-generated checklist

Responsibilities

Responsibility Area	Description
Eligibility Pre-screening	Applies policy rules to determine whether the customer qualifies for a group loan pathway (Levels 1–3) or enhanced individual appraisal (Level 4)
Customer Level Assignment	Assigns Customer Level 0–4 and a risk band (Low / Medium / High / Manual Review) based on loan history, KYC completeness, and cycle rules
Document Checklist	Identifies missing KYC or appraisal items and generates a prioritised checklist for the officer to collect at the next customer meeting
Affordability Estimation	Performs a simple income-surplus check using officer-entered cashflow data; flags affordability concerns for officer review
Credit Memo Draft	Compiles a structured summary that the officer submits to the credit committee — officer reviews before submission
Rationale Logging	Records the rules applied and data points used for every level assignment, supporting audit and appeal processes

Inputs & Outputs

Input	Output
Structured customer profile from Coordinator Agent	LoanTriage JSON: customer_level, recommended_product, risk_band, missing_items, rationale, next_action
Loan history (officer retrieves from system for existing customers)	KYC and appraisal document checklist for officer to present to customer
Policy parameters (cycle rules, graduation thresholds, caps)	Draft credit memo summary for officer review and committee submission

Input	Output
Officer-entered cashflow data (income, expenses, dependants)	Explainability rationale — bullet-point reasoning for level assignment

GUARDRAILS & DECISION BOUNDARIES

- ✦ Never commits to loan approval or disbursement — all outputs are phrased as eligible for screening or requires officer review.
- ✦ If required data fields are missing or inconsistent, defaults to Manual Review Required with no partial classifications.
- ✦ Exceptions such as policy waivers or unusual borrower profiles must be flagged and routed to Branch Manager.
- ✦ Graduation from group to individual loan (Level 4) requires credit committee approval — agent only recommends.

Performance Metrics

KPI Metric	Target / Benchmark
KYC document completeness rate at first officer submission	≥ 90%
Application turnaround time (triage to committee-ready pack)	≤ 2 business days
Level assignment accuracy vs. subsequent officer review	≥ 97%
First-cycle delinquency rate for approved customers (quality signal)	< 5% (PAR30)

A3

Collections & Reminder Agent**MISSION**

Manage due and overdue customer cases. Assign Level 5 when delinquency is present, run the arrears escalation ladder, and generate compliant reminder communications for the Collections Officer to send or deliver in person.

Primary Users

- Collections & Recovery Officer — primary user for daily arrears work
- Branch Manager — receives escalation alerts and approves rescheduling
- Admin Staff — generates and logs reminder messages as directed by the officer

Responsibilities

Responsibility Area	Description
Arrears Classification	Categorises each overdue loan into an arrears bucket: Due Today / 1–7 days / 8–30 days / 31–90 days / over 90 days, and updates Customer Level to 5
Reminder Generation	Drafts compliant reminder messages (SMS or officer call script) using approved templates; officer reviews and sends — agent never sends directly
Promise-to-Pay Capture	Records PTP details (amount, date, channel) entered by the officer after a customer meeting; schedules the next follow-up automatically
Escalation Ladder	Recommends the next escalation action based on arrears bucket and prior contact history; routes severe cases (over 30 days) to Branch Manager queue
Group Loan Coordination	For 3-member group loans, generates individual and group-level prompts to support the officer's joint-guarantee conversation — no public disclosure
Communication Log	Records every officer-confirmed send with template ID, channel, delivery status, and related loan ID for full audit trail

Inputs & Outputs

Input	Output
Loan account status: next due date, amount due, days past due	CollectionsCase JSON: customer_level=5, arrears_bucket, recommended_action, template_id, next_followup_date
Contact preferences and communication consent flags	Outbound message draft (SMS text / call script) for officer review before delivery

Input	Output
Prior communications log and PTP history	PTP record with follow-up schedule
Officer-entered notes from in-person customer meeting	Escalation alert to Branch Manager for cases requiring rescheduling or legal review

GUARDRAILS & DECISION BOUNDARIES

- ✦ No threatening, harassing, or shaming language — all templates are reviewed and pre-approved by management.
- ✦ Does not disclose account details in outbound messages beyond minimum required fields (amount and due date).
- ✦ Rescheduling and repayment plan approvals require Branch Manager or credit committee sign-off — agent only recommends.
- ✦ Group loan reminders must not publicly identify which member has defaulted — communications are individual and private.
- ✦ Every communication attempt must be logged whether or not the customer was contacted.

Performance Metrics

KPI Metric	Target / Benchmark
Early arrears cure rate (1–7 days resolved before escalation)	≥ 80% within 7 days
On-time collection rate vs. scheduled due amounts	≥ 95% by period
Promise-to-Pay kept rate (PTP commitments honored)	≥ 75%
Escalation response time (Branch Manager action on over-30-day cases)	≤ 24 hours

A4

Finance Agent

MISSION

Answer payment, receipt, and balance questions for officers and cashiers. Support end-of-day cash reconciliation with variance alerts. Ensures all financial queries are identity-verified and all postings are auditable.

Primary Users

- Finance Staff & Cashier — primary users for daily transaction queries
- Branch Manager — uses cash reconciliation summaries for EOD sign-off
- Loan Officers — query posting status when a customer reports a payment in person

Responsibilities

Responsibility Area	Description
Payment Confirmation	Confirms whether a specific payment has been received and posted; returns receipt reference, date, and posting status for the officer to communicate to the customer
Balance & Due Amount Lookup	Provides current outstanding balance and next installment due amount after the officer has confirmed customer identity
Disbursement Readiness	Checks whether all approval and signing conditions are satisfied before disbursement — reports status to officer or cashier
Cash Reconciliation Support	Calculates expected end-of-day cash position (opening float + collections minus disbursements) and alerts staff to variances above tolerance
Receipt Integrity Check	Verifies receipt sequencing and flags gaps or duplicates to the Branch Manager — supports daily and monthly audit processes
Exception Escalation	If a customer reports payment but no posting is found, immediately flags the discrepancy to Branch Manager as a priority exception

Inputs & Outputs

Input	Output
Officer-verified customer identifier (NIC / phone + secondary check)	FinanceResponse JSON: balance, next_due, last_payment, receipt_no, posting_status
Loan ledger and transaction records	Disbursement readiness report (conditions met / outstanding items)

Input	Output
Cash session data: opening float, receipts, disbursements	CashControl JSON: expected_cash, counted_cash, variance, status, alerts
Officer-entered receipt number for verification	Exception alert to Branch Manager if mismatch detected

GUARDRAILS & DECISION BOUNDARIES

- ⚡ No edits or deletions to financial records — reversals are processed as new linked transactions with full audit trail.
- ⚡ Balance and payment data are only disclosed after the officer has completed identity verification.
- ⚡ Any cash variance or unreconciled difference is escalated to Branch Manager immediately — never suppressed.
- ⚡ Disbursement confirmation requires completed approval checklist — agent cannot unilaterally clear disbursement.
- ⚡ Receipt numbering gaps must be logged and investigated — agent flags but does not resolve.

Performance Metrics

KPI Metric	Target / Benchmark
Cash reconciliation variance (end of day)	Zero unreconciled differences
Payment posting timeliness	100% same-day posting
Receipt sequence integrity (no unexplained gaps)	Zero unresolved gaps
Identity verification compliance before disclosure	100% of queries

System Features by Module

This section describes the operational features available to branch staff across each system module. All features are accessed and operated by officers — not by customers. Each module is linked to the agents that support it.

Module ID	Module Name	Supporting Agent(s)
M-01	Client Registration	A1 Office Coordinator
M-02	Group Loan Management	A1 Office Coordinator + A2 Loan Processing
M-03	Loan Origination & Underwriting	A2 Loan Processing
M-04	Credit Decision Recording	A2 Loan Processing
M-05	Loan Disbursement & Scheduling	A4 Finance
M-06	Repayment Collection & Posting	A4 Finance
M-07	Arrears Monitoring & Collections	A3 Collections & Reminder
M-08	Individual Loan Graduation	A2 Loan Processing
M-09	Daily Cash Reconciliation	A4 Finance
M-10	Branch Dashboard & KPI Reporting	All Agents

M-01 — Client Registration

M-01

New Customer Registration & KYC Intake

Primary User: Loan Officer **Priority:** Critical

What the Officer can do with this module:

- ▶ New Client Registration form with fields for full name, NIC / national ID, photo upload, date of birth, residential address, phone number, and nearest landmark
- ▶ Purpose of visit recorded at registration (loan inquiry, repayment, complaint, or other)
- ▶ Auto-generated unique Client ID upon saving the record
- ▶ Duplicate NIC detection — system warns the officer if the NIC already exists in the database
- ▶ Document attachment support for scanned NIC, utility bill, and photo files linked to the client file
- ▶ Draft save option — incomplete registrations can be saved and completed on a follow-up visit
- ▶ All entries are timestamped and attributed to the staff member who created the record
- ▶ Role-based access: client file is accessible to Loan Officer, Branch Manager, and Admin — not Finance Cashier (data minimisation)

M-02 — Group Loan Management

M-02

Group Formation & Group Loan Application Entry

Primary User: Loan Officer **Priority:** Critical

What the Officer can do with this module:

- ▶ Create a new borrowing Group by selecting exactly 3 registered clients from the client database
- ▶ Auto-assigned unique Group ID with group formation date and assigned meeting day / time
- ▶ Each member's loan application is linked to the Group ID; system prevents a member from being in more than one active group simultaneously
- ▶ Group training completion recording with training date field (rights and obligations confirmed)
- ▶ Group guarantee agreement generated from system template and marked as signed and filed by the officer
- ▶ Side-by-side display of all 3 member profiles when viewing a group record
- ▶ Automatic loan cycle counter (Cycle 1, Cycle 2, Cycle 3+) based on completed loan history
- ▶ Overdue member warning — if any group member has an active overdue balance, system displays a warning before allowing a new group application

M-03 — Loan Origination & Underwriting

M-03

Loan Application & Underwriting Data Entry

Primary User: Loan Officer **Priority:** Critical

What the Officer can do with this module:

- ▶ New loan application created and linked to a client ID (individual) or group ID (group loan)
- ▶ Application form captures loan purpose, requested amount, proposed tenor (weeks), repayment frequency, business description, and monthly income/expense summary
- ▶ Built-in cashflow worksheet for income, business expenses, household expenses, and net surplus entry
- ▶ Automatic affordability indicator calculated and displayed (net surplus vs. proposed weekly repayment)
- ▶ KYC document checklist status tracking: NIC, proof of address, business evidence, and group guarantee — each marked as received or pending
- ▶ Credit memo text field for the Loan Officer to record assessment summary and risk observations
- ▶ Application status management: Draft, Submitted for Review, or Pending Documents
- ▶ Branch Manager dashboard notification triggered automatically when an application is submitted for review

M-04 — Credit Decision Recording

M-04

Credit Committee Review & Loan Decision

Primary User: Branch Manager **Priority:** Critical

What the Officer can do with this module:

- ▶ Applications queue showing all submissions with status Submitted for Review, sorted by submission date
- ▶ Full application pack view: client profile, cashflow worksheet, KYC checklist status, credit memo, and loan history
- ▶ Decision form capturing: Approved / Declined / Conditional Approval, approved amount, approved tenor, conditions attached, and committee meeting date
- ▶ Committee Members Present field (minimum 2 names required for decisions above the configurable approval threshold)
- ▶ Decision rationale is a required field — record cannot be saved without it
- ▶ Automatic repayment schedule generation upon approval, made immediately available to Finance Cashier
- ▶ Decline reason recorded and Loan Officer notified to communicate outcome to customer in person
- ▶ Maker-checker enforcement: the Loan Officer who submitted the application cannot record the approval decision

M-05 — Loan Disbursement & Scheduling

M-05

Loan Disbursement & Passbook / Schedule Issuance

Primary User: Finance Cashier **Priority:** Critical

What the Officer can do with this module:

- ▶ Disbursement screen shows all approved loans pending disbursement with conditions status visible
- ▶ System blocks disbursement if any conditional approval conditions remain uncleared
- ▶ Disbursement entry records loan ID, disbursed amount, disbursement date, and cashier ID — posted to loan ledger on the same day
- ▶ Automatic generation of customer repayment schedule (all installment due dates and amounts) upon disbursement
- ▶ Passbook entry record generated for the officer to issue to the customer in person
- ▶ Disbursement confirmation requires completed checklist approval — agent cannot unilaterally clear
- ▶ All disbursement transactions are immutable after posting — reversals are new linked transactions

M-06 — Repayment Collection & Posting

M-06

Repayment Collection & Receipt Posting

Primary User: Collections Officer / Finance Cashier **Priority:** Critical

What the Officer can do with this module:

- ▶ Repayment entry screen for the officer to post cash received against the correct loan account and installment
- ▶ System-generated sequential receipt number assigned to every posted payment
- ▶ Receipt printout or digital receipt record for the officer to hand to the customer
- ▶ Passbook update entry generated alongside each posted repayment
- ▶ Partial payment support — officer can record partial amounts with remaining balance displayed
- ▶ Overpayment handling — excess posted to next installment with officer confirmation required
- ▶ Group loan posting — repayments can be entered for all 3 members in a single session
- ▶ Daily running total of collections visible to cashier during the session

M-07 — Arrears Monitoring & Collections

M-07

Arrears Dashboard & Collections Follow-Up Logging

Primary User: Collections & Recovery Officer **Priority:** High

What the Officer can do with this module:

- ▶ Arrears Dashboard showing all active loans with a missed installment, grouped into buckets: 1–7 days, 8–30 days, 31–90 days, and over 90 days overdue
- ▶ Each overdue account shows client name, Group ID (if group loan), days overdue, total overdue amount, and last contact date
- ▶ Contact attempt logging: date, contact method (phone / field visit / group meeting), and outcome (reached / not reached / promised to pay / refused)
- ▶ Promise-to-Pay capture: officer records promised amount and promised date; system schedules follow-up reminder automatically
- ▶ Broken promise tracking: if promised date passes without payment, system flags it and increments a broken promises counter
- ▶ Auto-escalation prompt: after 3 broken promises or 30 or more days overdue, system prompts the officer to escalate to Branch Manager
- ▶ Group loan joint view: all 3 members' repayment status displayed together so officer can assess joint guarantee activation
- ▶ Full contact log visible to Branch Manager with all attempts and notes per account

M-08 — Individual Loan Graduation

M-08

Individual Loan Graduation Assessment & Upgrade

Primary User: Loan Officer + Branch Manager **Priority:** High

What the Officer can do with this module:

- ▶ System automatically flags a client as a Graduation Candidate when they meet the configurable graduation rule (e.g., completed at least 1 cycle with zero or minimal late payments)
- ▶ Graduation Candidate badge displayed on the client profile, visible to Loan Officer and Branch Manager
- ▶ Graduation Assessment form pre-filled with the client's existing loan and repayment history
- ▶ Additional appraisal fields for individual loan: household income, other debts, references, and business verification notes
- ▶ Completed graduation assessment submitted via the same committee review workflow as standard applications
- ▶ Upon approval, loan is created as Individual Loan type with its own repayment schedule separate from group loan history
- ▶ Graduation event recorded in the client's history with date and approving officer
- ▶ Gap notification if the customer does not yet qualify, showing exactly what is needed (e.g., 1 more on-time installment)

M-09 — Daily Cash Reconciliation

M-09

Daily Cash Reconciliation & Finance Close

Primary User: Finance Cashier + Branch Manager **Priority:** High

What the Officer can do with this module:

- ▶ Daily Cash Summary screen showing opening cash balance, total repayments received by payment method, total disbursements made, and calculated closing cash balance
- ▶ Physical cash count entry by the Cashier; system compares to calculated closing balance and highlights any variance
- ▶ Reconciliation note field for the Cashier to explain variances — variance remains visible and cannot be hidden
- ▶ Full daily transaction list: all receipts (receipt number, client, amount) and disbursements (loan ID, client, amount)
- ▶ Branch Manager digital sign-off with timestamped approval; once signed off, day records are locked and cannot be edited
- ▶ Delegated sign-off option if Manager is out of office — delegation is logged
- ▶ Export to PDF or Excel for sharing with head office or owner
- ▶ Bank deposit recording with deposit slip reference number tracked separately from counter receipts

M-10 — Branch Dashboard & KPI Reporting

M-10

Branch Performance Dashboard & KPI Reporting

Primary User: Branch Manager **Priority:** High

What the Officer can do with this module:

- ▶ Real-time summary dashboard: total active loans, total outstanding portfolio value, number of active clients, active groups, and applications pending decision
- ▶ PAR30 (Portfolio at Risk — loans with any installment over 30 days overdue) displayed as both a count and a percentage of total portfolio
- ▶ Repayment rate metric showing percentage of installments due in the current week and month that have been collected
- ▶ Overdue trend chart showing PAR30 over the past 12 weeks to surface portfolio improvement or deterioration
- ▶ Staff activity summary per staff member for the current week: applications submitted, collections posted, and contact attempts logged
- ▶ Filter controls: date range, loan type (group or individual), and loan cycle
- ▶ KPI pack export to PDF or Excel for head office reporting
- ▶ Automatic weekly KPI report generated every Monday morning for the Manager to review and annotate before distributing

Workflow Playbooks

The following playbooks illustrate how the four agents collaborate across the most common office scenarios. In every playbook, the Officer is the customer-facing actor — agents support behind the scenes.

Playbook A — New Customer Walk-In → Level Assignment

#	Actor	Action	Output / Handoff
1	Loan Officer	Meets customer in person; gathers name, NIC, purpose of visit, and any documents brought	Officer has raw customer information
2	Office Coordinator (A1)	Officer enters details; agent confirms identity, classifies intent, routes to Loan Processing	TriageResult with initial level and route
3	Loan Processing (A2)	Applies eligibility rules; assigns Level 0/1/2 and risk band; identifies missing KYC items	KYC checklist + LoanTriage JSON
4	Office Coordinator (A1)	Assembles final case summary and document checklist for officer to action	Officer receives next-steps pack
5	Loan Officer	Communicates outcomes and document requirements to customer in person; books follow-up appointment	Customer informed; appointment scheduled

Playbook B — Existing Customer Eligibility Review

#	Actor	Action	Output / Handoff
1	Loan Officer	Customer visits for repeat / graduation loan discussion; officer verifies identity in system	Identity confirmed; loan history retrieved
2	Loan Processing (A2)	Reviews history; assigns Level 3 or 4 (or Manual Review); generates updated cashflow checklist	Level + appraisal checklist
3	Office Coordinator (A1)	Schedules next step: cashflow refresh meeting or committee submission	Officer task: schedule appraisal / submit pack
4	Loan Officer	Communicates eligibility status and next steps to customer; collects additional documents if required	Customer understands pathway; documents collected

Playbook C — Overdue Customer Contact

#	Actor	Action	Output / Handoff
1	Collections Officer	Reviews daily overdue list in system; identifies customers to contact today	Prioritised contact list
2	Collections & Reminder (A3)	Classifies arrears bucket per customer; generates reminder draft and call script for officer	CollectionsCase + message draft
3	Collections Officer	Contacts customer in person or by phone; records outcome and any PTP commitment in system	Contact attempt logged; PTP recorded if obtained
4	Collections & Reminder (A3)	Schedules next follow-up; if over 30 days, triggers escalation alert to Branch Manager queue	Follow-up scheduled; Manager notified if required
5	Branch Manager	Reviews escalated cases; approves or declines rescheduling; signs off on legal referrals	Decision recorded; case updated

Playbook D — Payment Confirmation Query

#	Actor	Action	Output / Handoff
1	Loan Officer / Cashier	Customer reports payment made; officer retrieves customer record and queries Finance Agent with receipt number	Query submitted with verified identity
2	Finance Agent (A4)	Checks posting status; returns receipt reference, date, and posting confirmation	FinanceResponse JSON
3	Loan Officer	Communicates payment status to customer; if posted, confirms and closes query	Customer informed; query closed
4	Finance Agent (A4)	If no posting found, immediately flags exception to Branch Manager — officer does not dismiss the query	Exception alert to Branch Manager
5	Branch Manager	Investigates discrepancy; authorises corrective posting if payment verified	Resolution posted; customer notified by officer

System-Wide Operating Principles

1. Human-in-the-Loop — Non-Negotiable

AI agents classify, recommend, and prepare. Human officers decide, approve, and communicate. No agent may approve a loan, waive a penalty, authorize a disbursement, or send a customer communication without officer confirmation.

2. Customer Interaction Model

Customers interact with Officers — not with the system.

Officers use the system as a back-office operational tool.

Agents produce outputs for officer eyes — not for direct customer delivery.

All customer communication is officer-mediated, reviewed, and approved before delivery.

3. Maker-Checker Controls

The same person cannot both prepare and approve a critical action. Officers prepare application packs; Branch Managers or credit committee members approve. Cashiers post receipts; Finance Staff reconcile. This separation is enforced at the system level.

4. Respectful Client Treatment

All reminder and collections communications must use pre-approved templates. No agent generates free-form language for customer delivery. Tone standards: factual, respectful, non-harassing, and privacy-preserving. Violations are grounds for immediate review.

5. Auditability

Every agent decision is stored with: timestamp, acting agent ID, input data hash, output JSON, and rationale. Every outbound communication is logged with: template ID, rendered text, channel, and delivery status. No data may be deleted — corrections are new linked transactions.

6. Escalation by Default

When an agent encounters incomplete data, a policy exception, or an out-of-range scenario, the default action is escalation to Branch Manager — not a best-guess classification. Confidence thresholds are set conservatively to minimize misclassification risk.

Agent Roles Summary Matrix

Capability	A1 Coordinator	A2 Loan Processing	A3 Collections	A4 Finance
Customer identity lookup	✓ Primary	–	–	–
Intent classification & routing	✓ Primary	–	–	–
Customer level assignment (0–4)	Coordinator	✓ Primary	–	–
Customer level assignment (5)	Coordinator	–	✓ Primary	–
KYC document checklist	–	✓ Primary	–	–
Eligibility pre-screening	–	✓ Primary	–	–
Credit memo preparation	–	✓ Primary	–	–
Arrears bucket classification	–	–	✓ Primary	–
Reminder draft generation	–	–	✓ Primary	–
PTP capture & scheduling	–	–	✓ Primary	–
Escalation to Branch Manager	✓ Shared	✓ Shared	✓ Shared	✓ Shared
Payment posting confirmation	–	–	–	✓ Primary
Balance & due date lookup	–	–	–	✓ Primary
Cash reconciliation support	–	–	–	✓ Primary
Loan approval / disbursement	✗ Never	✗ Never	✗ Never	✗ Never
